DETAILED ACTION

Remarks

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/01/2010 has been entered.
2. This office action is in response to the amendment filed on 9/01/2010.
3. Claims 1, 18 and 22 have been amended.
4. Claims 3, 4, 23 and 24 have been canceled.
5. Claims 25 and 26 have been added.
6. Claims 1, 6-8, 17-19, 21, 22, 25 and 26 remain pending and are now being allowed (re-numbered as claims 1-11).

Allowable Subject Matter

1. Claims 1, 6-8, 17-19, 21, 22, 25 and 26 are allowed. As the Applicants pointed out under REMAKRS section, page number 6-9, the cited prior arts (Crump, Sanchez and Hundt) do not disclose and/or fairly suggest at least recited feature and/or limitation of a method for program debugging, wherein the method comprising: setting a plurality of breakpoints corresponding to a plurality of events in a Basic Input/Output System (BIOS) or driver program code, each event being a test executed by the BIOS/driver

Art Unit: 2192

program code to a peripheral device and taking a general processing path when the peripheral device is working well or an error processing path when the peripheral device is in an error state; setting/resetting a parameter to simulate the peripheral device is working well or error state throughout execution of the event corresponding to the diagnosis code by a branch command of a script file via an emulator; wherein the breakpoints are software interrupt, using a trap to stop the execution of the emulator; wherein the breakpoint can be set ahead or after of program codes of the corresponding event; If the breakpoints are set a head of the corresponding events, the parameters are reset after the breakpoints; If the breakpoints are set after the corresponding events, the script should spontaneously jump ahead of the branch command of the event and reset the parameter of the event”, and in as such manners as similarly recited in the independent claims 1, 18 and 22, thus each of the dependent claims are allowable for at least the same reasons.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
